Atty Dkt. No.: RICE-012 USSN: 09/509,196

## LISTING OF THE CLAIMS

No claim amendments are presented. A clean copy of the pending claims is presented below to facilitate discussion.

- 1.-4. (Canceled)
- 5. (Previously Presented) A host cell transformed with the polynucleotide molecule of claim 32.
- 6. (Previously Presented) The host cell of claim 5, wherein the host cell is a mammalian, insect, yeast or bacterial host cell.
- 7. (Previously Presented) A method of producing a protein, comprising culturing the host cell of claim 5 under conditions suitable for the expression of the polynucleotide molecule and optionally recovering the protein.

## 8.-18. (Canceled)

- 19. (Previously Presented) An isolated polynucleotide molecule according to claim 32, wherein the polynucleotide molecule comprises a nucleotide sequence as shown in SEQ ID NO:1.
- 20. (Previously Presented) A vector comprising a polynucleotide molecule according to claim 32.
- 21. (Previously Presented) A vector according to claim 20, wherein the polynucleotide molecule comprises a nucleotide sequence as shown in SEQ ID NO:1.
- 22. (Previously Presented) An isolated polynucleotide molecule comprising a nucleotide sequence having at least 95% sequence identity to that shown in SEQ ID NO:1.

Atty Dkt. No.: RICE-012 USSN: 09/509,196

23. (Canceled)

24. (Previously Presented) A host cell transformed with the polynucleotide molecule of claim 22.

- 25. (Previously Presented) The host cell of claim 24, wherein the host cell is a mammalian, insect, yeast or bacterial host cell.
- 26. (Previously Presented) A method of producing a protein, comprising culturing the host cell of claim 24 under conditions suitable for the expression of the polynucleotide molecule and optionally recovering the protein.
- 27. (Previously Presented) An isolated polynucleotide molecule according to claim 22, wherein the polynucleotide molecule comprises a nucleotide sequence as shown in SEQ ID NO:1.
- 28. (Previously Presented) A vector comprising a polynucleotide molecule according to claim 22.
- 29. (Previously Presented) A vector according to claim 28, wherein the polynucleotide molecule comprises a nucleotide sequence as shown in SEQ ID NO:1.
  - 30. (Canceled)
- 31. (Previously Presented) A polynucleotide according to claim 32, wherein the polynucleotide molecule comprises a nucleotide sequence encoding an amino acid sequence as shown in SEQ ID NO:2.
- 32. (Previously Presented) An isolated polynucleotide molecule comprising a nucleotide sequence having at least 95% sequence identity to a nucleotide sequence encoding SEQ ID NO:2.

Atty Dkt. No.: RICE-012 USSN: 09/509,196

33. (Previously Presented) An isolated polynucleotide molecule comprising a nucleotide sequence having at least 95% sequence identity to a nucleotide sequence encoding amino acid residues 232-538 of SEQ ID NO:2.

- 34. (Previously Presented) A host cell transformed with the polynucleotide molecule of claim 33.
- 35. (Previously Presented) The host cell of claim 34, wherein the host cell is a mammalian, insect, yeast or bacterial host cell.
- 36. (Previously Presented) A method of producing a polypeptide, comprising culturing the host cell of claim 34 under conditions suitable for the expression of the polynucleotide molecule and optionally recovering the protein.
- 37. (Previously Presented) An isolated polynucleotide molecule according to claim 33, wherein the nucleotide sequence comprises a nucleotides sequence of nucleotides 694-1614 of SEQ ID NO:1.
- 38. (Previously Presented) A vector comprising a polynucleotide molecule according to claim 33.
- 39. (Previously Presented) A vector according to claim 38, wherein the polynucleotide comprises a nucleotides sequence of nucleotides 694-1614 of SEQ ID NO:1.
- 40. (Previously Presented) The isolated polynucleotide molecule according to claim 33, wherein the polynucleotide molecule comprises a nucleotide sequence encoding amino acid residues 232-538 of SEQ ID NO:2.
- 41. (Previously Presented) The isolated polynucleotide molecule according to claim 33, wherein the polynucleotide molecule comprises a nucleotide sequence encoding amino acid residues 232-888 of SEQ ID NO:2.
